# SURYA PRATAP SINGH RATHOD

+91 9575996762 | suryarathore051@gmail.com | LinkedIn | GitHub

## EDUCATION

**Bennett University, Greater Noida** Aug 2024 – Jun 2028
B.Tech, Computer Science and Engineering | CGPA: 8.14
**Coursework:** Data Structures & Algorithms, OOP, Operating Systems, DBMS

## TECHNICAL SKILLS

**Languages:** C++, Python, TypeScript, JavaScript, SQL
**Frontend:** React, Next.js, HTML/CSS, Tailwind CSS
**Backend & Databases:** Node.js, PostgreSQL/PostGIS, Supabase (Auth, Row-Level Security), FastAPI
**Tools:** Git, GitHub, VS Code, Vercel
**CS Fundamentals:** OOP, DBMS, Data Structures & Algorithms

## PROJECTS

**CampusEats — Campus Food Discovery & Review Platform** (**Solo Project**) Live | GitHub
*Next.js 15, TypeScript, Supabase (PostgreSQL, Auth), Tailwind CSS, Vercel*

- Built and deployed the entire full-stack platform end-to-end, letting students browse campus outlets and menus and rate items on taste, hygiene, quantity and value for money.
- Implemented **email/password authentication** with Supabase Auth and Bennett University email validation, and wrote **PostgreSQL Row-Level Security** policies for student and admin access.
- Designed a **relational schema** of 4 tables (profiles, outlets, menu_items, ratings) with database triggers for profile creation on signup and timestamp updates.
- Built an **admin panel** to manage outlets, menu items and ratings; tested with ~8 student accounts.

**Bhoomi Sanket — Land Acquisition Delay Monitoring Platform** | **SIH 2026** Live | GitHub
**Team Leader** · Ranked **62nd among 600+ teams** in the internal round · Qualified for next-stage presentation round
*Next.js 14, TypeScript, PostgreSQL/PostGIS, Supabase, React-Leaflet, FastAPI*

- Designed the monorepo architecture (Next.js App Router, REST route handlers, shared TypeScript contracts) for stage-aware tracking of land acquisition projects.
- Implemented **backend and database logic** for project management, alerts, admin and audit-log modules on **PostgreSQL/PostGIS** with Supabase Row-Level Security.
- Integrated these modules with the team's dashboard and GIS map into a prototype deployed on Vercel with synthetic demo data.
- Defined a FastAPI service interface for future ML-based risk scoring; ML inference is not connected, so the prototype produces no predictive scores.
- Led the team and handled **manual testing** of application features, final integration and the pitch.

**Samadhan — Civic Issue Reporting Platform** (SIH 2025, **Team Leader**) Live | GitHub
*Flask, Python, SQLite, SQLAlchemy, JavaScript, Leaflet.js, Chart.js*

- Designed the **database schema** (issues, departments, votes) with a unique constraint preventing duplicate votes per device, and integrated the Flask backend with the Leaflet.js map and Chart.js analytics views.
- Implemented the issue-reporting flow with **GPS coordinate capture**; submitted issues are saved in the database and remain visible after a page refresh.
- Led architecture/design and final integration; collaborated with teammates on rule-based routing of reports to **six municipal departments** and automatic priority assignment.

## LEADERSHIP

**Technical Head, Data Science Society**, Bennett University Sep 2026 – Present

- Lead the technical function (**3 sub-heads**) within a ~25-member core; enhanced the society website, conducted **~80 junior-core technical interviews**, and mentor 10–15 juniors.

**Vice-Captain, Men's Volleyball Team**, Bennett University Aug 2025 – Present

- Coordinate practice, tournament logistics and coach/university communication, and lead the team in the captain's absence.
- Team secured **9 inter-university podium finishes** (2024–2026: 1 Gold, 7 Silver, 1 Bronze) at BML, DTU, NIU, Christ University, IBI, AIMT, Sportikon and IILM.

**Batch Representative, Batch 48**, Bennett University Aug 2024 – Present

- Liaise between the batch and faculty/administration on registrations, forms and student issues.

## ACHIEVEMENTS & CERTIFICATIONS

- **SIH 2025** internal round: top 200 of 600+ teams.
- **Certifications:** Introduction to Modern Database Systems (Saylor Academy); AWS Academy Cloud Foundations.
